A photograph of a green printed circuit board (PCB) with various electronic components. The board is rectangular with a central cutout. On the left side, there is a multi-pin connector with several pins extending outwards. In the center, there is a small integrated circuit (IC) with several pins. To the right of the IC, there is a gold-plated SMA connector. The board is placed on a blue surface next to a ruler for scale. The ruler shows measurements in centimeters and inches. The board is oriented vertically, with the multi-pin connector on the left and the SMA connector on the right. The central IC is located between the two connectors. The board has a green solder mask and silver-colored conductive traces. There are also some small surface-mount components and solder joints visible on the board.
